I. Plenary talks

Structural and electrical characterisation of semiconductor materials using a nuclear microprobe
D.N. Jamieson 1

Characterisation of atmospheric fine particles using IBA techniques
D.D. Cohen 14

Strain and defect imaging in thin crystals using a nuclear microprobe
M.B.H. Breese, P.J.C. King and D.G. de Kerckhove 23

II. Round Table A: Future analytical needs for industry and technologies

Future analytical needs for industry and technology
J.E.E. Baglin, J.C. Davis, P. Gabella, V.M. Prozesky and S. Sie 35

III. Round Table B: Near surface analysis and charge exchange studies with high resolution spectrographs

Report on the round table session on: Near surface analysis and charge exchange studies with high-resolution spectrographs
D.O. Boerma 42

Energy loss and charge exchange: Statistics and atomistics
P. Sigmund and L. Glazov 47

IV. Fundamentals of IBA: Range, stopping power, damage, cross sections

Parameterization of nuclear reactions cross section using R-matrix theory
E. Berthoumieux, B. Berthier, C. Moreau, J.P. Gallien and A.C. Raoux 55

Evaluation of non-Rutherford proton elastic scattering cross section for carbon
A.F. Gurbich 60

Revised cross sections of the $^{32}S(d,p)^{33}S$ reactions
M.J.F. Healy and D.W. Lane 66

Total cross section of the $^{14}N(d,p\gamma)^{15}N$ nuclear reaction for analytical applications
H. van Bebber, L. Borucki, K. Farzin, Á.Z. Kiss and W.H. Schulte 72

Elastic scattering cross sections for the analysis of helium by ^{1}H backscattering and hydrogen by ^{4}He ERD
A. Nurmela, J. Räisänen and E. Rauhala 77

Deviations from Rutherford backscattering cross section for backscattering of ^{6}Li ions from fluorine between 2.5 and 7 MeV
Ž. Pastuović, M. Jakšić, T. Tadić and P. Oliaiy 81

0168-583X/98/$19.00 © 1998 Elsevier Science B.V. All rights reserved

Proton elastic scattering cross section on carbon from 350 keV to 3 MeV
S. Mazzoni, M. Chiari, L. Giuntini, P.A. Mandò and N. Taccetti 86
Impact-parameter dependence of energy loss of swift light ions in gold
W.M. Arnoldbik, V.A. Khodyrev, G.A. Iferov and D.O. Boerma 91
Measurement of heavy-ion stopping powers by combining Doppler shift attenuation and transmission methods
K. Arstila, P. Tikkanen and J. Keinonen 98
Influence of the chemical state on the stopping of protons and He-ions in some oxides
P. Bauer, R. Golser, D. Semrad, P. Maier-Komor, F. Aumayr and A. Arnau 103
Stopping cross section measurements of Ti thin films
A. Climent-Font, J. Räisänen and E. Rauhala 109
Slowing down of relativistic heavy ions and new applications
H. Geissel and C. Scheidenberger 114
Improved calculations of the electronic energy loss under channeling conditions
P.L. Grande and G. Schiwietz 125
Angular dependent energy loss of 0.8–2.0 MeV He ions channeled along the Si⟨1 0 0⟩ direction
G.d.M. Azevedo, M. Behar, J.F. Dias, P.L. Grande, J.H.R. dos Santos, R. Stoll, C. Klatt and S. Kalbitzer 132
A method of determining the stopping power of light ions in crystal channels in the backscattering geometry
M. Kokkoris, S. Kossionides, X. Aslanoglou, G. Kaliambakos, T. Paradellis, S. Harissopulos, E.N. Gazis, R. Vlastou, C.T. Papadopoulos and R. Groetschel 137
RBS/ERD simulation problems: Stopping powers, nuclear reactions and detector resolution
J.F. Ziegler 141
Range parameters of gold and lead in carbon and carbon in gold at reduced energies of $10^{-3} < \epsilon < 1$
E. Friedland, S. Kalbitzer, M. Hayes, C. Klatt, G. Konac and C. Langpape 147
Low energy ion backscattering spectrometry of multi-layer targets
C. Klatt, S. Kalbitzer and G. Konac 153
Energy loss and straggling of H and He ions of keV energies in Si and C
G. Konac, S. Kalbitzer, C. Klatt, D. Niemann and R. Stoll 159
Ta, Au and Th L X-ray energy shifts and yields induced by 0.6, 1.2, 2.4 and 4 MeV/nucleon Kr ions
Y. El Masri, C. Heitz, J. Larcher, G.J. Costa, A. Pape, T. Keutgen, I. Tilquin, F. Hanappe and P. Duhamel 166
High resolution study of the K X-ray spectra from low Z elements
M. Kavčič, M. Budnar, A. Mühleisen and I. Török 173
Energy straggling induced errors in heavy-ion PIXE analysis
T. Tadic, Y. Mokuno, Y. Horino, K. Fujii and M. Jaksic 179
L X-ray production cross sections of medium Z elements by ^{4}He ion impact
I. Orlić, T. Osipowicz and C.H. Sow 184
PIXE cross sections for some moderately toxic heavy metals
N. De Cesare, E. Perillo, G. Spadaccini and M. Vigilante 189
A polynomial curve for ionization cross sections of the atomic K-shell induced by protons and heavier ions
C.M. Romo-Kröger 196
Theoretical intensity distributions of K X-ray satellite spectra emitted from K and Cr
M. Uda, T. Yamamoto, T. Takenaga and K. Hayashi 200

V. Thin films, multilayers, interfaces

Nuclear reaction analysis of deuterium in ultrathin films of SiO_2 on Si
I.J.R. Baumvol, F.C. Stedile, C. Radtke, F.L. Freire Jr., E. Gusev, M.L. Green and D. Brasen 204
Hydrogen effect on solid phase epitaxy of Si on Si (0 0 1) surface
M. Hasegawa, Y. Tanaka and N. Kobayashi 209
Interpretation of ion channeling results from epitaxial Pt thin films and Co/Pt multilayers
P.C. McIntyre, C.J. Maggiore and M. Nastasi 214

Ion beam studies of CdTe films epitaxially grown on Si, GaAs and sapphire substrates
E. Alves, M.F. da Silva, J.C. Soares, N.V. Sochinskii and S. Bernardi 220
Depth profiling sulphur in bulk CdTe and CdTe/CdS thin film heterojunctions
D.W. Lane, G.J. Conibeer, S. Romani, M.J.F. Healy and K.D. Rogers 225
Characterization of high nitrogen content carbon nitride thin films by RBS and infrared techniques
J.M. Méndez, A. Gaona-Couto, E. Andrade, J.C. Pineda, E.P. Zavala and S. Muhl 231
Growth and characterization of carbon nitride thin films prepared by laser ablation
R. Soto, P. González, X. Redondas, E.G. Parada, J. Pou, B. León, M. Pérez-Amor, M.F. da Silva and J.C. Soares 236
RBS as a tool for topographic modelling of polycrystalline thin film interactions
J.E.E. Baglin, M.H. Tabacniks and A.J. Kellock 241
High precision Rutherford backscattering characterisation of 3-D objects implanted by plasma immersion ion implantation
N.P. Barradas 247
RBS studies of the intercalation compound Hg_xTiS_2: Morphology and staging
T. Butz, R.-H. Flagmeyer, S. Jankuhn, T. Reinert, M.F. da Silva, J.C. Soares and W. Tröger 253
Analysis of a-B_xC_y:H_z coatings with IBA techniques
G. Giorginis, L. Persson, M. Hult, A. Crametz, E. Lugscheider and C.W. Siry 258
Epitaxial regrowth of C- and N-implanted silicon and α-quartz
F. Harbsmeier, W. Bolse, M.R. da Silva, M.F. da Silva and J.C. Soares 263
Structural characterization of metastable FeSi films and of Fe/FeSi multilayers
R. Moons, S. Degroote, J. Dekoster, A. Vantomme[2] and G. Langouche 268
Composition analysis of Co doped $FeSi_2$ films by combining standard and heavy-ion RBS
W. Bohne, G.-U. Reinsperger, J. Röhrich, G. Röschert and B. Selle 273
Interfacial roughness of multilayered TiN/ZrN coatings
C.J. Tavares, L. Rebouta, E.J. Alves, B. Almeida, J. Bessa e Sousa, M.F. da Silva and J.C. Soares 278
RBS analysis of the diffusion of nano-size spheres in a polymer matrix
D.H. Cole, K.R. Shull, L.E. Rehn and P.M. Baldo 283
Ion beam analysis and alpha spectrometry of sources electrodeposited on several backings
J.L. Ferrero Calabuig, F. Vera Tomé, A. Martín Sánchez, C. Roldán García, M.F. da Silva, J.C. Soares, F.J. Ager, D. Juanes Barber and P. Rubio Montero 290
Application of heavy-ion RBS to compositional analysis of thin films
H. Niwa, S. Nakao and K. Saitoh 297
First stages of low temperature and low pressure carbonization of Si (0 0 1) in acetylene
F.C. Stedile, F. Rochet, C. Poncey, G. Dufour, R. Gunnella, M. De Crescenzi and M. Froment 301
Modelling the sorption of mercury (II) on (hydr)oxides: Application of ion beam analysis to sorption processes
C. Tiffreau and P. Trocellier 308

VI. Nuclear microprobes: Technology and applications

Nuclear microprobe analysis and imaging: Current state of the art performances
F. Watt, T. Osipowicz, T.F. Choo, I. Orlic and S.M. Tang 313
Scanning proton microprobe applied to analysis of individual aerosol particles from Amazon Basin
F. Gerab, P. Artaxo, E. Swietlicki and J. Pallon 318
Characterisation of single aerosol particles from Debrecen region, Hungary using microPIXE
I. Rajta, G.W. Grime, Z. Kertész, I. Borbély-Kiss and E. Koltay 324
Ion microprobe analyses of ancient human bone
S. Jankuhn, T. Butz, R.-H. Flagmeyer, T. Reinert, J. Vogt, B. Barckhausen, J. Hammerl, R. Protsch von Zieten, D. Grambole, F. Herrmann and K. Bethge 329
Proton and X-ray microprobes in the studies of the mineralization process
E. Rokita, P. Chevallier, P.H.A. Mutsaers, P. Populus, G. Tatoń and M.J.A. de Voigt 334

An external milli-beam for archaeometric applications on the AGLAE IBA facility of the Louvre museum
T. Calligaro, J.-C. Dran, H. Hamon, B. Moignard and J. Salomon 339
Observation of surface topography using an RBS microbeam
A. Simon, F. Pászti, I. Uzonyi, A. Manuaba, Á.Z. Kiss and I. Rajta 344
Application of grazing exit angle in RBS microprobe measurements
A. Simon, F. Pászti, I. Uzonyi, A. Manuaba and Á.Z. Kiss. 350
Nuclear reaction microanalysis: A key for the study of uranium dioxide corrosion mechanisms
P. Trocellier, C. Cachoir and S. Guilbert 357
Photon-tagged nuclear reaction analysis – Evaluation of the technique for a nuclear microprobe
P. Kristiansson, S. Al-Suhaili, M. Elfman, K.G. Malmqvist, J. Pallon and K.A. Sjöland 362
High energy resolution PIXE analysis using focused MeV heavy ion beams
Y. Mokuno, Y. Horino, T. Tadić, M. Terasawa, T. Sekioka, A. Chayahara, A. Kinomura, N. Tsubouchi and K. Fujii 368
Microanalysis of masklessly fabricated microstructures using nuclear microprobe
Y.K. Park, M. Takai, T. Nagai, T. Kishimoto, A. Seidl, C. Lehrer, L. Frey and H. Ryssel 373
Maskless fabrication of 3-dimensional microstructures in PMMA using a nuclear microprobe
D.G. de Kerckhove, M.B.H. Breese, M.A. Marsh and G.W. Grime 379
A high resolution beam scanning system for deep ion beam lithography
J.L. Sanchez, J.A. van Kan, T. Osipowicz, S.V. Springham and F. Watt 385
Development of a fast multi-parameter data acquisition system for microbeam analyses
T. Sakai, T. Hamano, T. Hirao, T. Kamiya, K. Murozono, J. Inoue, S. Matsuyama, S. Iwasaki and K. Ishii 390

VII. Impurity site location, defect structure, strain

Determination of the strain depth profile in solid-phase epitaxially grown SiGe layers using RBS/channeling
A. Rodríguez, T. Rodríguez, A. Kling, J.C. Soares, M.F. da Silva and C. Ballesteros 395
RBS/channeling analysis of damage and annealing processes of Nb-implanted TiO_2
Y. Aoki, S. Yamamoto, H. Takeshita and H. Naramoto 400
RBS-channeling and TEM studies on the regrowth of low temperature argon ion amorphized lithium tantalate ($LiTaO_3$) single crystal
Z. Zhang, I.A. Rusakova and W.K. Chu 404
Channelling and low energy electron induced X-ray spectroscopy on neon implanted beryllium single crystal
B. Deconninck and F. Bodart 410
Measurement of laser annealed SiCGe by nuclear microprobe analysis
M.M. Campbell, N. Mazhoore, K.K. Lee, D.N. Jamieson and E. Finkman 415
Lattice site location of thulium and erbium implanted GaAs
E. Alves, M.F. da Silva, J.C. Soares, M.O. Henry, R. Gwilliam, B.J. Sealy, K. Freitag, R. Vianden and D. Stievenard 421
Lattice site determination of Cr in low doped lithium niobate single crystals using PIXE/channeling
A. Kling, J.C. Soares, M.F. da Silva, J.A. Sanz-García, E. Diéguez and F. Agulló-López 426
Lattice site location of Hf in $LiNbO_3$: Influence of dopant concentration and crystal stoichiometry
J.G. Marques, A. Kling, J.C. Soares, L. Rebouta, M.F. da Silva, E. Diéguez and F. Agulló-López. 431
Ion implantation in TiO_2: Effect of the charge state on the lattice site occupation
O. Meyer, I. Khubeis, R. Fromknecht and S. Massing 436
Lattice site location and annealing behavior of W implanted TiO_2
R.C. da Silva, E. Alves, L.M. Redondo, R. Fromknecht and O. Meyer 442
Lattice location of oxygen atoms in UO_2 single crystals leached in water
L. Nowicki, A. Turos, F. Garrido, C. Choffel, L. Thomé, J. Jagielski and H. Matzke 447
Analysis of semiconductors by ion channelling: Applications and pitfalls
J.S. Williams, M. Conway, J.A. Davies, M. Petravic, H.H. Tan and J. Wong-Leung 453

Nucleation and growth of platelet bubble structures in He implanted silicon
P.F.P. Fichtner, J.R. Kaschny, A. Kling, H. Trinkaus, R.A. Yankov, A. Mücklich, W. Skorupa, F.C. Zawislak, L. Amaral, M.F. da Silva and J.C. Soares 460
A channeling investigation of the structural modifications in uranium dioxide submitted to swift-ion irradiation and aqueous corrosion
F. Garrido, C. Choffel, L. Thomé, J.-C. Dran, L. Nowicki, A. Turos and J. Domagala 465
Backscattering/channeling study of high-dose rare-earth implants into Si
A. Vantomme, U. Wahl, M.F. Wu, S. Hogg, H. Pattyn, G. Langouche and H. Bender 471
The dose effect of silicon implantation on hydrogen trapping in aluminum
M. Ogura, T. Higuchi, M. Imai, A. Itoh and N. Imanishi 478
Thermal behavior of hydrogen in helium-implanted high-purity SUS316L
M. Ogura, N. Yamaji, T. Higuchi, M. Imai, A. Itoh, N. Imanishi and K. Nakata 483
Rutherford backscattering analysis of damage in ion implanted GaAs/$Al_{0.44}Ga_{0.56}As$
E. Wendler and P.I. Gaiduk 488
GRID spectroscopy – a new nuclear method for lattice site localization of foreign atoms
W. Wesch, A. Karmann, H.G. Börner, M. Jentschel and K.-H. Heinig 494
Ion beam channeling study on the damage accumulation in yttria-stabilized cubic zirconia
K. Yasuda, M. Nastasi, K.E. Sickafus, C.J. Maggiore and N. Yu 499
Generation and relief of mechanical stresses in ion irradiated SiC and SiO_2
F. Harbsmeier, J. Conrad and W. Bolse 505
Modification of silicon–carbon film properties under high energy ion beam irradiation
X. Redondas, P. González, R. Soto, B. León, M. Pérez-Amor, M.F. da Silva and J.C. Soares 511
Light element impurities in ion beam bombarded Au–Al layers
A. Markwitz and G. Demortier 516

VIII. High resolution depth profiling and nuclear resonance reaction techniques

High resolution depth profiling in silicon oxynitride films using narrow nuclear reaction resonances
L.G. Gosset, J.-J. Ganem, I. Trimaille, S. Rigo, F. Rochet, G. Dufour, F. Jolly, F.C. Stedile and I.J.R. Baumvol 521
Detection and depth profiling of ^{19}F using a resonance at 2313 keV in the $^{19}F(\alpha,p)^{22}Ne$ nuclear reaction
J.D. Borgardt, M.D. Ashbaugh, L.C. McIntyre, J.O. Stoner, R.B. Gregory, M. Azrak and J. Wetzel . . . 528
Morphological investigation of porous samples by resonant backscattering spectrometry
F. Pászti, E. Szilágyi, Z.E. Horváth, A. Manuaba, G. Battistig, Z. Hajnal and E. Vázsonyi 533
Ultra-high depth resolution RBS and SIMS of the modification of a Ge delta in Si during 2 keV O_2^+ sputtering
W.M. Arnoldbik, Z.X. Jiang, P.F.A. Alkemade and D.O. Boerma 540
Narrow nuclear resonance position or cross section shape measurements with a high precision computer controlled beam energy scanning system
G. Amsel, E. d'Artemare, G. Battistig, E. Girard, L.G. Gosset and P. Révész 545
Study of ion implantation profiles by the PIXE technique
P. Midy, G. Lagarde, I. Brissaud, J.P. Frontier and J. Chaumont 551
Oxygen depth profiling in TiO_x/SiO_2 prepared by sol–gel method using $^{16}O(\alpha,\alpha)^{16}O$ resonant backscattering
Y. Miyagawa, K. Saitoh, S. Nakao, T. Nonami, K. Kato, H. Taoda and S. Miyagawa 557
Annealing behaviour and ranges of implanted ions in III–V and II–VI compound semiconductor materials
K. Väkeväinen, T. Ahlgren, E. Rauhala and J. Räisänen 563
On anomalous concentration depth profiles of atoms implanted into polymers
V. Hnatowicz, J. Vacík, J. Červená, V. Peřina, V. Švorčík and V. Rybka 568

IX. Elastic recoil detection analysis (ERDA)

Nonequilibrium charge states of recoil ions in high resolution elastic recoil detection analysis
G. Dollinger, M. Boulouednine, A. Bergmaier, T. Faestermann 574

Quantitative trace hydrogen distributions in natural diamond using 3D-micro-ERDA microscopy
R.D. Maclear, S.H. Connell, B.P. Doyle, I.Z. Machi, J.E. Butler, J.P.F. Sellschop, S.R. Naidoo and E. Fritsch 579
Helium bubbles in silicon: Study of the residual helium content using elastic recoil detection analysis
J.R. Kaschny, P.F.P. Fichtner, A. Muecklich, U. Kreissig, R.A. Yankov and W. Skorupa 583
Blocking- and channeling-ERDA with heavy ions
H. Nolte, W. Assmann, H. Huber, S.A. Karamian and H.D. Mieskes 587
Elastic recoil detection analysis with heavy ion beams
J.A. Davies, J.S. Forster and S.R. Walker 594
Elastic recoil detection with single atomic layer depth resolution
G. Dollinger, C.M. Frey, A. Bergmaier and T. Faestermann 603
The development of a facility for heavy-ion elastic recoil detection analysis at the Australian National University
H. Timmers, R.G. Elliman, G.R. Palmer, T.R. Ophel and D.J. O'Connor 611
Extremely thin silicon ΔE detectors for ion beam analysis
H.J. Whitlow, T. Winzell and G. Thungström 616
Simulation of surface roughness effects in ERDA
I.M. Yesil, W. Assmann, H. Huber and K.E.G. Löbner 623
Influence of surface roughness on measuring depth profiles and the total amount of implanted ions by RBS and ERDA
R. Behrisch, S. Grigull, U. Kreissig and R. Grötzschel 628
The Berlin time-of-flight ERDA setup
W. Bohne, J. Röhrich and G. Röschert 633
A compact ΔE–E_{res} detector for elastic recoil detection with high sensitivity
A. Bergmaier, G. Dollinger and C.M. Frey 638
Time-of-flight ERDA of dual implanted metals
N. Dytlewski, P.J. Evans, I.G. Brown, F. Liu, E.M. Oks and G.Y. Yushkov 644
Limitations to depth resolution in high-energy, heavy-ion elastic recoil detection analysis
R.G. Elliman, H. Timmers, G.R. Palmer and T.R. Ophel 649
Quantitative compositional depth profiling of $Si_{1-x-y}Ge_xC_y$ thin films by simultaneous elastic recoil detection and Rutherford backscattering spectrometry
S.C. Gujrathi, S. Roorda, J.G. D'Arcy, R.J. Pflueger, P. Desjardins, I. Petrov and J.E. Greene 654
Elastic recoil detection using time-of-flight for analysis of TiN/AlSiCu/TiN/Ti contact metallization structures
S.C. Gujrathi, G. Gagnon, V. Fortin, M. Caron, J.F. Currie, L. Ouellet, Y. Tremblay 661
Complementary scattered and recoiled ion data from ToF–E heavy ion elastic recoil detection analysis
P.N. Johnston, M. El Bouanani, W.B. Stannard, I.F. Bubb, D.D. Cohen, N. Dytlewski and R. Siegele. . 669
In situ ERDA studies of ion drift processes during anodic bonding of alkali-borosilicate glass to metal
U. Kreissig, S. Grigull, K. Lange, P. Nitzsche and B. Schmidt 674
Application of ERDA method to study hydrogen and helium in Ti, Zr and Nb membranes
S. Nagata, K. Takahiro, S. Yamaguchi, S. Yamamoto, B. Tsuchiya and H. Naramoto 680
Application of a ΔE–E telescope for sensitive ERDA measurement of hydrogen
R.J. Sweeney, V.M. Prozesky, C.L. Churms, J. Padayachee and K. Springhorn 685
Ion beam analysis of oxidised a-C:D layers on Be – A comparison of ^{4}He RBS and ^{28}Si ERD analysis
J. Roth, D.S. Walsh, W.R. Wampler and M. Mayer 689
A new setup for elastic recoil analysis using ion induced electron emission for particle identification
E. Steinbauer, O. Benka and M. Steinbatz 695
Theoretical approximation of energy distribution of elastically recoiled hydrogen atoms
E. Szilágyi, L.S. Wielunski and F. Pászti 701
Radiation damage during heavy ion elastic recoil detection analysis of insulating materials
S.R. Walker, J.A. Davies, J.S. Forster, S.G. Wallace and A.C. Kockelkoren 707
Multiple scattering effects in depth resolution of elastic recoil detection
L.S. Wielunski, E. Szilágyi and G.L. Harding 713

Mass and energy dispersive elastic recoil detection studies of low temperature Si/Pd/GaAs and Si/Pd/$Al_xGa_{(1-x)}As$ interfacial reactions
Y. Zhang, M. Hult, L. Persson, H.J. Whitlow, M. Andersson, I.F. Bubb, M. El Bouanani, P.N. Johnston, S.R. Walker, D.D. Cohen, N. Dytlewski, M. Östling and C. Zaring 719
ERD–TOF and HIRBS with 1.7 MV tandem accelerator
Y.S. Kim, J.K. Kim, H.W. Choi, G.D. Kim and H.J. Woo 724
High energy heavy ions in materials characterization at NSC Pelletron
D.K. Avasthi 729

X. Novel ion beam techniques

Radioactive ion beams and techniques for solid state research
J.G. Correia 736
Electron emission channeling with position-sensitive detectors
U. Wahl, J.G. Correia, S. Cardoso, J.G. Marques, A. Vantomme, G. Langouche and ISOLDE collaboration 744
Annealing behavior of ZnTe investigated with ^{111m}Cd-emission channeling
K. Bharuth-Ram, M. Restle and H. Hofsäss 751
Identification of deep bandgap states in 4H- and 6H-SiC by radio-tracer DLTS and PAC-spectroscopy
N. Achtziger, D. Forkel-Wirth, J. Grillenberger, T. Licht and W. Witthuhn 756
Depth-selective defect analysis of Si implanted with As^+ under channeling conditions using a variable-energy positron beam
K. Hirata and Y. Kobayashi 763
Slow positron implantation spectroscopy of high current ion nitrided austenitic stainless steel
W. Anwand, S. Parascandola, E. Richter, G. Brauer, P.G. Coleman and W. Möller 768
Comparative study of kinetic energy spectra and mass distributions of Ta_n ions sputtered from tantalum by atomic and molecular ion bombardment
S.F. Belykh, U.K. Rasulev, A.V. Samartsev and I.V. Veryovkin 773
Combined TOF-MS/RBS analysis of LiF thin films bombarded by MeV nitrogen ions
J.A.M. Pereira and E.F. da Silveira 779
Study of iodine migration in zirconia using stable and radioactive ion implantation
N. Chevarier, F. Brossard, A. Chevarier, D. Crusset and N. Moncoffre 784
Characterization of TiCN coatings deposited by magnetron sputter-ion plating process: RBS and GDOS complementary analyses
F.L. Freire Jr., L.F. Senna, C.A. Achete and T. Hirsch 788
Measurement of excess energies of ion beams extracted from a microwave ion source
N. Sakudo, K. Hayashi, J. Yokota, A. Kawasaki, N. Ikenaga and N. Sakaguchi 793
A novel analysis system of synchrotron-orbital-radiation-light induced photoemission coupled with ion scattering: SORI
Y. Kido, H. Namba, T. Nishimura, A. Ikeda, Y. Yan and A. Yagishita 798

XI. High energy channeling, transmission channeling

Experimental test of the single adatom exchange model in surfactant-mediated growth of Ge on Si(100)
A.A. Bailes III, M.A. Boshart and L.E. Seiberling 804
Cyclotron-based high energy ion channeling
L.J. van IJzendoorn, P.W.L. van Dijk and M.J.A. de Voigt 810
Channeling and blocking measurements on quasicrystals
D. Plachke, H.D. Carstanjen, R.M. Emrick, H. Nolte, H. Huber, W. Assmann and R. Grötzschel 816
Design of the entrance ion optics for SIMS and LEIS in situ monitoring of deposition processes
S. Průša, J. Zlámal and T. Šikola 822

The use of novel beam scanning techniques to image channeling patterns with a scanning nuclear microprobe
A. Saint and D.N. Jamieson 825

XII. PIXE and PIGE analysis

Identification of an unusual source of background signals in energy dispersive PIXE analysis – A detective story
B. Hietel and K. Wittmaack 831
Enhanced X-ray yields from insulating samples
A.P. Jesus, M.A. Reis and L.C. Alves 837
Development of the RMIT external beam facility for PIXE
M. Moser, I.F. Bubb, P.N. Johnston, M. El Bouanani, W.B. Stannard and R.C. Short 841
Provenance study of rubies from a Parthian statuette by PIXE analysis
T. Calligaro, A. Mossmann, J.-P. Poirot and G. Querré 846
PIXE and SEM studies of Tartesic gold artefacts
M.A. Ontalba Salamanca, G. Demortier, F. Fernandez Gomez, P. Coquay, J.-L. Ruvalcaba-Sil and M.A. Respaldiza 851
Weathering of glass in moist and polluted air
K. Cummings, W.A. Lanford and M. Feldmann 858
Non-destructive evaluation of glass corrosion states
M. Mäder, D. Grambole, F. Herrmann, C. Neelmeijer, M. Schreiner and G. Woisetschläger 863
Insight into the usewear mechanism of archaeological flints by implantation of a marker ion and PIXE analysis of experimental tools
M. Christensen, T. Calligaro, S. Consigny, J.-C. Dran, J. Salomon and P. Walter 869
South American precious metals and the European economy: A scientific adventure in the Discoveries time
M.F. Guerra, A. Gondonneau and J.-N. Barrandon 875
PIXE analysis of Salado polychrome ceramics of the American Southwest
D.C. Gosser, M.A. Ohnersorgen, A.W. Simon and J.W. Mayer 880
Analysis of Mexican obsidians by IBA techniques
G. Murillo, R. Policroniades, D. Tenorio, B. Méndez, E. Andrade, J.C. Pineda, E.P. Zavala and J.L. Torres 888
PIXE analysis of pottery from the recovery of a renaissance wreck
A. Zucchiatti, F. Cardoni, P. Prati, F. Lucarelli, P.A. Mandò and G.P. Martino 893
Non-destructive analysis and appraisal of paper-like objects
H. Cheng, Y. Ding, W. He and F. Yang 897
Initial inter-laboratory testing of the Rossendorf–Oxford (ROX97) secondary standard for X-ray analysis
C. Neelmeijer, M. Mäder, R. Jarjis, T. Calligaro, J. Salomon, M. Schreiner and T. Gantz 902
IBA analysis of a possible therapeutic ancient tooth inlay
E. Andrade, J.C. Pineda, E.P. Zavala, G. Murillo, R. Chavez, R. Lazcurain, M.L. Espinosa and O. Villanueva 908
Amalgam components drift in teeth-toxicity risks: A preliminary approach
M.L. Carvalho, T. Pinheiro, M.A. Barreiros, C. Casaca, A.S. Cunha and P. Chevallier 913
Measurement of trace elements in tree rings using the PIXE method
T. Aoki, Y. Katayama, A. Kayawa, S. Koh and K. Yoshida 919
Target and matrix problems in the determination of trace elements in wood material by PIXE
C.M. Romo-Kröger, L.A. López, M.J. Avila and L.C. Eaton 923
PIXE analysis of proteins from a photochemical center
C. Solís, A. Oliver and E. Andrade 928
Quantification by PIXE of metallic sites in proteins separated by electrophoresis
D. Strivay, B. Schoefs and G. Weber 932

Investigation of the calcium content in joint cartilage: Is it connected with (early arthrotic) changes in cartilage structure?
T. Reinert, T. Butz, R.-H. Flagmeyer, S. Jankuhn, J. Vogt, W. Gründer, M. Kanowski, M. Wagner, A. Werner, D. Grambole and F. Herrmann 936
Air particulate matter characterisation of a rural area in Portugal
L.C. Alves, M.A. Reis and M.C. Freitas 941
Time resolved aerosol monitoring in the urban centre of Soweto
P. Formenti, H.J. Annegarn and S.J. Piketh 948
PIXE, PIGE and ion chromatography of aerosol particles from northeast Amazon Basin
F. Gerab, P. Artaxo, R. Gillett and G. Ayers 955
Source profile derivation for an arc welding shop using time sequenced sampling and PIXE analysis
P. Formenti, D.J. Van Den Heever and H.J. Annegarn 961
Investigation of the particulate derived from indigenous zinc smelting using PIXE analytical technique
G. Zhu and G. Wang 966
A study of atmospheric aerosols from five sites in Mexico city using PIXE
J. Miranda, A. López-Suárez, R. Paredes-Gutiérrez, S. González, O.G. de Lucio, E. Andrade, J.R. Morales and M.J. Avila-Sobarzo 970
External-beam PIGE for fluorine determination in atmospheric aerosol
F. Calastrini, P. Del Carmine, F. Lucarelli, P.A. Mandò, P. Prati and A. Zucchiatti 975
Quality assurance of environmental PIXE analysis in Prague
Z. Nejedlý, J. Král, J. Voltr, R. Krejčí, E. Swietlicki, J. Černý, P. Kubík and J. Švejda 981
A testing technique of streaker aerosol samplers via PIXE analysis
P. Prati, A. Zucchiatti, S. Tonus, F. Lucarelli, P.A. Mandò and V. Ariola 986
Traffic component of urban aerosols determined by PIXE method
A. Wróbel and E. Rokita 990
Chemical state analysis in air by high-resolution PIXE
K. Maeda, K. Hasegawa, H. Hamanaka and M. Maeda 994
Influence of the mining activity on sediments from the Odiel river (sw of Spain) analyzed by TTPIXE
J.E. Martín, R. García-Tenorio, M.A. Respaldiza, J.P. Bolívar and M.F. da Silva 1000
Elemental composition in sediments and water in the Trancão river basin. A preliminary study
F. Araújo, T. Pinheiro, L.C. Alves, P. Valério, F. Gaspar and J. Alves 1005
Analysis of Singapore marine sediments by PIXE
S.M. Tang, I. Orlic and X.K. Wu 1013
Analysis of chlorine in used oils by external beam PIXE–PIGE
H.W. Choi, Y.S. Kim, G.D. Kim, H.J. Woo, J.K. Kim and G.H. Lee 1018

XIII. Evaluation of IBA and related techniques

Abundance and detection sensitivity in secondary-neutral mass spectrometry with electron-gas post-ionization
H. Gnaser, H.-J. Schneider and H. Oechsner 1023
High spatial resolution 3D analysis of materials using gallium focused ion beam secondary ion mass spectrometry (FIB SIMS)
B. Tomiyasu, I. Fukuju, H. Komatsubara, M. Owari and Y. Nihei 1028
SIMS analysis of epitaxial layers for power- and micro-electronics
B.G. Svensson, M.K. Linnarsson, J. Cardenas and M. Petravić 1034
RBS and SIMS study of the simultaneous phase growth of iridium silicides formed by RTA in vacuum
A. Almendra, J.J. Serrano, A. Kling, T. Rodríguez, J.M. Blanco, M.F. da Silva, J. Sanz-Maudes, M. Aguilar and J.C. Soares 1040
Oxide scale depth profiling of lanthanum-deposited AISI-304: An ion beam analysis
F.J. Ager, M.A. Respaldiza, A. Paúl, J.A. Odriozola, M.F. da Silva and J.C. Soares 1045
Progress on the HVEE ^{14}C isotope ratio mass spectrometer for biomedical applications
D.J.W. Mous, W. Fokker, R. van den Broek, R. Koopmans, C. Bronk Ramsey and R.E.M. Hedges ... 1052

Ion beam induced structural transformations in Si_mGe_n superlattices
N.A. Sobolev, J. Gerster, G. Mauckner, M. Wolpert, W. Limmer, K. Thonke, R. Sauer, H. Presting and U. König . . . 1057
Ion bombardment induced relaxation of strained AlGaAs/GaAs heterostructures studied by the complementary use of RBS-channeling and X-ray synchrotron radiation
A. Turos, W. Wierzchowski, K. Wieteska, E. Wendler, W. Wesch, W. Graeff, R. Grötzschel and W. Strupiński . . . 1062
High dose He implantation in two Ti alloys: Effects on structure and thermal oxidation
I.C. Vickridge, P.B. Johnson, P.W. Gilberd and Y. Morrison . . . 1068
RBS study of galena thermal oxidation in air with a 6-MeV $^{16}O^{3+}$ ion beam
B. Ponsot, J. Salomon and P. Walter . . . 1074

XIV. Low and medium energy ion scattering

Observation of behavior of Ge δ-doped layer in Si(001)
T. Fuse, K. Kawamoto, T. Shiizaki, E. Tazou, M. Katayama and K. Oura . . . 1080
High depth resolution analysis of Cu/Si(111) "5 × 5" structure with medium energy ion scattering
K. Yamashita, T. Yasue, T. Koshikawa, A. Ikeda and Y. Kido . . . 1086
Anomalous inelastic energy losses and trajectory effects at small angle ion scattering by single crystal surface
A.A. Dzhurakhalov and F.F. Umarov . . . 1092
Direct determination of the lattice site of H atoms on the (1 × 2) reconstructed Cu (1 1 0) surface
A.V. Mijiritskii, U. Wahl, M.H. Langelaar and D.O. Boerma . . . 1097
CAICISS studies of atomic-hydrogen-induced structural changes of the Sb terminated Si surfaces
J.-T. Ryu, K. Kui, K. Noda, M. Katayama and K. Oura . . . 1102
The orientational effects in low-energy ions scattering from monocrystalline surfaces
R.A. Salimova and V.K. Ferleger . . . 1108
Surface structure of hydrogen terminated (1 0 0) Si by medium energy ion scattering
M. Takai and M. Taketani . . . 1112
Small angle ion scattering by structures on the single crystal surface corresponding to initial stages of adsorption
F.F. Umarov, A.M. Rasulov and A.A. Dzhurakhalov . . . 1116
Low-energy recoil scattering from hydrogen adsorbed on Ni (1 1 1)
K. Umezawa, T. Ito and S. Nakanishi . . . 1121
MEIS surface structure determination methodology: Application to Ni (100)c(2 × 2)-O
T.C.Q. Noakes, P. Bailey and D.P. Woodruff . . . 1125
Low energy ion scattering from the single crystal surface covered by adsorbed diatomic molecules
A.A. Dzhurakhalov, S. Khakimov and V.K. Ferleger . . . 1131
Crystallographic azimuthal-angle dependence of the neutral fraction of hydrogen emerging from GaAs (1 1 0)
N. Imanishi, K. Hadano, A. Aratake, T. Ohdaira, M. Imai and A. Itoh . . . 1135

XV. Computer simulations: New methods of data acquisition and analysis

Energy resolution enhancement in ion beam experiments with Bayesian probability theory
R. Fischer, M. Mayer, W. von der Linden and V. Dose . . . 1140
Bayesian techniques and the principle of maximum entropy in ion-beam analysis applications
V.M. Prozesky, J. Padayachee, R. Fischer, W. von der Linden, V. Dose and R.A. Weller . . . 1146
VRBS: A virtual RBS simulation tool for ion beam analysis
J.P. Stoquert, F. Pêcheux, Y. Hervé, H. Marchal, R. Stuck and P. Siffert . . . 1152
The RBS data furnace: Simulated annealing
N.P. Barradas, P.K. Marriott, C. Jeynes and R.P. Webb . . . 1157
RBS/simulated annealing analysis of iron–cobalt silicides
N.P. Barradas, C. Jeynes and M.A. Harry . . . 1163

RBS/Simulated annealing analysis of buried $SiCO_x$ layers formed by implantation of O into cubic silicon carbide
N.P. Barradas, C. Jeynes and S.M. Jackson 1168
Data acquisition and real-time computing by a DSP-based system
S. Aiello, A. Anzalone, M. Bartolucci, G. Cardella, S. Cavallaro, E. DeFilippo, S. Feminò, M. Geraci, F. Giustolisi, P. Guazzoni, M. Iacono Manno, G. Lanzalone, G. Lanzanò, S. Lo Nigro, G. Manfredi, A. Pagano, M. Papa, S. Pirrone, G. Politi, F. Porto, F. Rizzo, S. Sambataro, L. Sperduto, C. Sutera and L. Zetta. 1172

XVI. New developments of IBA

Compact broad range magnetic spectrometer for use in ion beam analysis
W.A. Lanford, B. Anderberg, H. Enge and B. Hjorvarsson 1177
Ion beam analysis with monolayer depth resolution
H.D. Carstanjen 1183
Sub-monolayer phosphorus coverage measurements on CrCoTa/NiP hard disks using PIXE
L. Rodríguez-Fernández, W.N. Lennard, G.R. Massoumi, H. Xia, L.J. Huang, Y. Hung and S. Chang . 1191
Some applications of high-resolution RBS and ERD using a magnetic spectrometer
K. Kimura, K. Nakajima and M. Mannami. 1196
Dynamic in situ diagnostics using high-energy ion beam analysis
W. Möller, W. Fukarek, S. Grigull, O. Kruse and S. Parascandola 1203
Probing of magnetic surfaces with inherent monolayer sensitivity by ion scattering
A. Närmann, M. Dirska, J. Manske and M. Schleberger. 1212
Evaluation of energy loss from DUAL-TOF spectra
M. Bergsmann, P. Hörlsberger, F. Kastner and P. Bauer. 1218
Using heavy ion back scattering spectrometry (HIBS) to solve integrated circuit manufacturing problems
J.C. Banks, B.L. Doyle, J.A. Knapp, D. Werho, R.B. Gregory, M. Anthony, T.Q. Hurd and A.C. Diebold. 1223
Improved ion beam analysis facilities at the University of Surrey
C. Jeynes, N.P. Barradas, M.J. Blewett and R.P. Webb. 1229
A fast beam deflection system for the application in a time of flight spectrometer
N. Piel, H.W. Becker, J. Meijer, W.H. Schulte and C. Rolfs 1235
Detection of small lattice strains using beam rocking on a nuclear microprobe
D.G. de Kerckhove, M.B.H. Breese, A.J. Wilkinson and G.W. Grime 1240
Ion-detectors for TOF mass analyzers
M. Gonin, Y.H. Chen, T. Horvath, M. Theiss and H. Wollnik 1244

XVII. IBA of new materials

Ion channeling studies of GaN layers on c-oriented sapphire
B. Holländer, S. Mantl, M. Mayer, C. Kirchner, A. Pelzmann, M. Kamp, S. Christiansen, M. Albrecht and H.P. Strunk. 1248
"Carbon! ... and its analysis"
F. Sellschop and S.H. Connell. 1253
Analysis and characterization of real catalysts using ion beam analysis
F.C. Stedile and J.H.Z. dos Santos 1259
RBS-channeling analysis of virgin 6H–SiC: Experiments and Monte Carlo simulations
M. Bianconi, E. Albertazzi, A. Carnera, G. Lulli, R. Nipoti and A. Sambo 1267
Ion beam analysis of 6H SiC implanted with erbium and ytterbium ions
A. Kozanecki, C. Jeynes, B.J. Sealy and A. Nejim 1272
Analysis of hydrogen in technical layers
K.H. Ecker, U. Reinholz, M. Volbracht and H.-P. Weise 1277

Analysis of deuterium induced nuclear reactions giving criteria for the formation process of expanded austenite
S. Parascandola, R. Günzel, R. Grötzschel, E. Richter and W. Möller 1281
Radiation damage of $YBa_2Cu_3O_7$ superconductors
R. Vlastou, E.N. Gazis, C.T. Papadopoulos, E. Liarocapis, D. Palles, N. Poulakis, S. Kossionides, M. Kokkoris, G. Kaliabakos, W. Assmann and P. Berbeich 1286
Light impurities in HTC BiSrCaCuO superconductor films
N. Matsunami, O. Onoue, M. Noguchi, J. Nozaki and Y. Takai 1291
High temperature channeling analysis of $YBa_2Cu_3O_{7-\delta}$ single crystals
F. Wang, H. Zama, H. Ohtsuka, M. Sato, S. Koyama, Y. Ishida and T. Morishita 1296
Correlation between the Tl concentration depth profiles and the thallination time in Tl–Ba–Ca–Cu–O superconducting films
J.C. Cheang-Wong, M. Jergel, E. Andrade, C. Falcony, A. Morales and A. Conde-Gallardo 1300
Depth resolution and dynamic range of $^{18}O(p,\alpha)^{15}N$ depth profiling
J.R. Liu, Y.P. Li, Q.Y. Chen, X.T. Cui, R. Christoffersen, A. Jacobson and W.K. Chu 1306
RBS and PIXE study of gallium depth profiling in ZSM-5 gallo-aluminosilicate zeolites
Z. Gabelica and G. Demortier 1312

XVIII. Characterisation of electronic properties: IBIC, SEU, IBIL microscopy

A DLTS and RBS analysis of the angular dependence of defects introduced in Si during ion beam channelling using 435 keV alpha-particles
P.N.K. Deenapanray, M.C. Ridgway, F.D. Auret and E. Friedland 1322
IBIC study of charge collection properties in Si(Li) detectors
M. Jakšić, S. Fazinić, T. Tadić, M. Bogovac, I. Bogdanović and Ž. Pastuović 1327
IBIC and IBIL microscopy applied to advanced semiconductor materials
C. Manfredotti, F. Fizzotti, P. Polesello, E. Vittone, M. Truccato, A. Lo Giudice, M. Jaksic and P. Rossi 1333
A study of He^+ ion-induced damage in silicon by quantitative analysis of charge collection efficiency data
R. Nipoti, C. Donolato, D. Govoni, P. Rossi, G.P. Egeni and V. Rudello 1340
Fluence dependence of IBIC collection efficiency of CMOS transistors
T. Osipowicz, J.L. Sanchez, I. Orlic, F. Watt, S. Kolachina, D.S.H. Chan and J.C.H. Phang 1345
The influence of ion induced damage on lateral charge collection and IBIC image contrast
M.B.H. Breese and K.M. Horn 1349
A comparison between the use of EBIC and IBIC microscopy for semiconductor defect analysis
M.B.H. Breese, A. Amaku and P.R. Wilshaw 1355
Trace elements and charge recombination in polycrystalline photovoltaic materials
L.C.G. Witham, D.N. Jamieson, R.A. Bardos and A. Saint 1361

Author Index 1367
